FOR PEDIATRIC RANGES, REFER TO CHART BELOW

- These updates took place on 11/6/21 with the update to our LIS and a shared system with UVMHN. These updated reference ranges are based on a Boston Children’s Hospital study that was published in Pediatric Reference Intervals, Eighth Edition, copyright 2021, pages 209-253 by Wong, Brugnara, Straseski, Kellogg and Adeli. These were derived using the Sysmex XN testing platform on which our assays are also performed. The testing platform, test names, and ordering processes remain the same.
